FIW <GO>
FIXED INCOME WORKSHEET

Simplifies your workflow and lets you price, compare, track performance and monitor liquidity across multiple bonds in lists from Portfolios, RUNZ, LPAD monitors or order management systems.

WHY USE FIW <GO>?

PRICE MULTIPLE BONDS IN YAS <GO>

Price multiple bonds simultaneously by running YAS <GO> on the bonds in "Calc Mode". Bonds can also be grouped by multiple classifications including sector, issuer, ratings, etc. Clicking on individual bonds brings up YAS.

IDENTIFY RICH/CHEAP RELATIVE VALUE

Identify which bonds are trading rich or cheap with respect to their historical spread, yield or price measures. Compare bonds on technical and fundamental basis. Clicking on individual bonds brings up FIRV.

MEASURE HISTORICAL PERFORMANCE

Measure historical changes in spread, yield or price measures for the bonds. Compare Total Return for the bonds over historical periods with reinvestment of cashflows. Clicking on individual bonds brings up FIHZ.

COMPARE LIQUIDITY ACROSS SOURCES

Compare liquidity on bonds across multiple pricing sources like BGN, MSG1, RUNZ, and ALLQ. Latest trade prints from TRACE are also monitored live. Clicking on individual bonds brings up FIPX, QMGR, ALLQ or QR.

Bloomberg

CHARTING PRICING

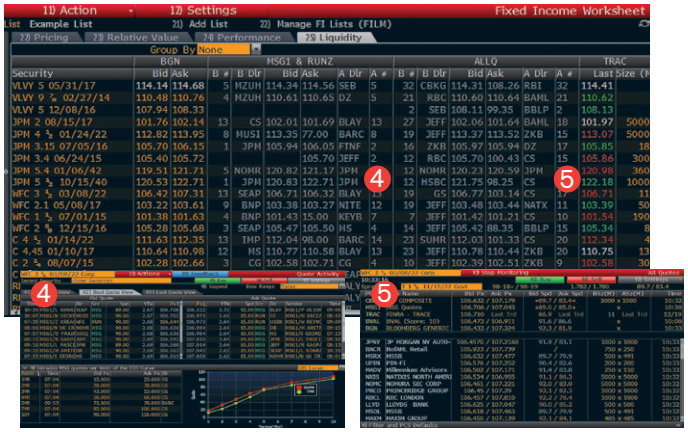
Chart pricing of multiple bonds across the various group by choices.

CHARTING RELATIVE VALUE

Chart rich and cheap bonds with respect to dynamic regression curves as well as with respect to industry sector, issuer benchmark, swap, sovereign and CDS curves.

CHARTING PERFORMANCE

Chart changes in spreads, yields or prices as well as historical returns across selected historical time periods.



CHARTING LIQUIDITY

Click through on individual bonds to view a price discovery platform (FIPX), message quotes (MSG1) and RUNZ (in QMGR), market depth (in ALLQ) and historical TRACE prints (in QR).

For additional information, press the <HELP> key twice on the Bloomberg Professional® service.
